Christmas Elf Pop-Up Card Template

print, cut, fold and glue

How it looks finished (illustration)

Print at 100% on 65-80 lb cardstock. Red line = cut, dashed line = fold (blue dashes fold the other way).
Cut the two red slits, fold the card in half, push the step inside and crease it, then open the card.
Cut out the figure on its outline and glue it to the front of the step. Card size folded: 4 x 5.5 in.
